HYDROSENSE ONE *LEGIONELLA PNEUMOPHILA* TEST REPORT

Complete the relevant sections for each test carried out.

PART 1 of 3 – DETAILS

Site:

Address:

Date of test: Time of test:

Batch number: Expiry date:

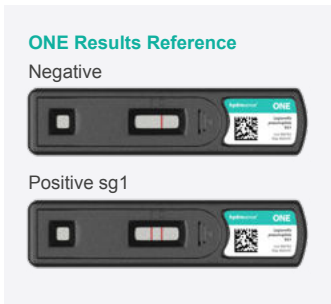

Sample Location:

Sample Point: Select a sample point...

Outlet: Hot Cold Mixed

System Type: Domestic Cooling Process Pool/Spa

Sample Water Temperature:

* Test must be read between 25-30 minutes after running the test. Any distinct line at the T position, no matter how faint, should be considered to be a positive result.

† A negative test means *Legionella pneumophila* sg1 has not been detected. A negative test does not mean the system is free from the risks associated with Legionella bacteria.

PART 2 of 3 – RESULTS

Hydrosense ONE		✓	Hazard Index Score <small>(From the Visual Scorecard included in ONE Multi Kits Only)</small>
Positive sg1*	<input type="checkbox"/>		
Negative†	<input type="checkbox"/>
