

Why choose Hydrosense?

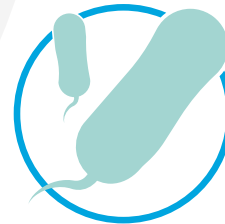

It's the worlds fastest on-site Legionella test.

It delivers test results in 25 minutes.

Detects *Legionella pneumophila* serogroups 1-15, which account for 97%* of Legionnaires' disease cases.

It can detect dangerous VBNC Legionella (Viable but Non-Culturable), something lab culture cannot.

Anyone can carry out the tests with minimal training.

It gives real-time results – you don't have to wait several weeks for lab reports.

*2009 – 2018 culture-confirmed data from the European Centre for Disease Control (ECDC), excluding unidentified Legionella and 2016 data not yet published by ECDC. A2398.
